

# Your Partners For Success

**Our experts provide innovative and comprehensive enterprise risk management and business continuity planning solutions for your most challenging needs.**

What are your biggest known and emerging risks?

Do your Directors understand the major risks faced by your corporation?

Does your risk management program address new business strategies, current initiatives, transactions, loss of key executives, quality, reputation, foreign operations and external factors such as federal government policies, SEC regulations, economic instabilities and supply chain failures?

Do you and your senior executives, managers and employees have uniform, timely and accurate risk management reports and dashboards with drill-downs that allow the proactive management of major risks?

Are your business continuity plans current? Do they reflect the ripple effects from the financial crisis including downsizings, operational changes and vendor capabilities?

**Download** – *The 2010 AMXI Enterprise Risk Management Program Guide. Our innovative and comprehensive approach to enterprise risk management provides directors with a clear understanding of major risks and empowers senior executives to more aggressively pursue opportunities that improve business performance and resiliency.*
