

## IT Compliance

*Innovative & Comprehensive Risk  
Management Solutions.*

AMXi can help address IT compliance requirements by implementing security monitoring for your IT infrastructure. The IT compliance monitoring system can be standalone or can be extended to cover end-to-end performance and availability monitoring of your full set of business systems. For those organizations that need to minimize the implementation and ongoing cost of monitoring, AMXi can rapidly establish IT compliance monitoring from a hosted cloud environment that has achieved SAS-70 Type II certification.

### **We Help Organizations**

- Define strategies for IT compliance monitoring and performance/availability monitoring to optimize the ROI for monitoring expense.
- Implement monitoring solutions that satisfy requirements such as Sarbanes-Oxley, HIPAA, ISO, COBIT, PCI DSS and FISMA.
- Maintain your IT compliance monitoring solution as an ongoing managed service from a cloud environment.
- Enhance the monitoring solution with ongoing changes that correspond to the changes in your compliance requirements and system/application changes.
- Integrate the IT compliance monitoring system with your incident management system to deliver a comprehensive auditable solution.
